

# RISHI GARHYAN

(704) 905-9576 | [garhyan2@illinois.edu](mailto:garhyan2@illinois.edu) | [linkedin.com/in/rishi-garhyan](https://www.linkedin.com/in/rishi-garhyan) | [happy-duck.github.io](https://happy-duck.github.io) | Urbana, IL

## EDUCATION

### University of Illinois Urbana-Champaign

Aug. 2024 – Dec. 2027

*Bachelor of Science in Computer Science, Grainger College of Engineering*

GPA: 3.98/4.00

- Relevant Coursework: Algorithms & Models of Computation, Data Structures, Computer Architecture, Game Development, Interactive Computer Graphics, Introduction to Extended Reality

## EXPERIENCE

### Computer Graphics Software Development Intern

May 2026 – Present

*Brunswick BI-DesignLab*

*Champaign, IL*

- Developing an interactive boating simulator in Unreal Engine 5.7 for a CES 2027 demo on AI-assisted navigation
- Building boat AI for ambient NPC traffic; contributing to game design and core backend systems
- Supporting cross-application data flow via a Python and Websockets layer
- Collaborating in a four-person intern team using Perforce on an alpha and pre-beta release schedule

### Unity VR Developer

October 2025 – Present

*Immersive Learning Lab*

*Champaign, IL*

- Designed and programmed a VR educational module in Unity and C# visualizing the University of Bern's MANiaC mass spectrometer, an instrument selected for ESA's Comet Interceptor mission
- Built a near-photorealistic VR replica of the International Space Science Institute lobby in Bern, featuring physics-driven interactable objects, NavMesh-driven NPCs, and a mural UI linking to other experiences
- Developed physics simulations, live data graphing (XCharts), animation systems, and custom interaction scripts
- Presented MANiaC and ISSI at the IMMERSE Annual Symposium (April 2026) via a poster and live demo

## PROJECTS

### Pelagos: A Marine Adventure | Unity, C#, Steam

January 2022 – November 2023

- Self-published an on-rails marine photography game on Steam; implemented core gameplay systems, UI, and asset integration in Unity 3D with C#
- Achieved 30k+ downloads on Steam and adoption by local schools' environmental science curriculum

### Party School | Unreal Engine 5, Blueprints

February 2026 – Present

- Developing a multiplayer sandbox party game based on the UIUC campus in a five-person team
- Imported the world map from the Google Map Tiles API via the BLOSM plugin and built the core project base shared across all minigames
- Building the racing minigame using Unreal's Chaos Vehicle system; supporting multiplayer integration and reviewing teammates' work

### Flarp | GameMaker Studio, ACM GameBuilders

August 2025 – Present

- Designed and programmed a puzzle-based Metroidvania, implementing ability-based platforming puzzles, interconnected single-screen levels, and game progression

### SportsBot | Python, discord.py, asyncio

August 2025 – December 2025

- Built an autonomous Discord bot using discord.py and asyncio-based timed tasks
- Developed REST API-driven data delivery and a slash-command user interface

## TECHNICAL SKILLS

**Programming Languages:** C++, C#, Java, Python, SQL

**Engines & Frameworks:** Unity, Unreal Engine, OpenXR, XR Interaction Toolkit, Django

**Tools:** Blender, Git, GitHub, GameMaker Studio, Perforce

## OTHER INVOLVEMENTS

VR Club at UIUC, ACM GameBuilders, Illini Fly Fishing, Illini Metagamers
